November 16, 2020

Sometimes rust can stain glass and can be very hard to remove. Here's how to remove rust from glass whether it is on your windows or drinking glasses.

All you need is a bowl, spray bottle, water, vinegar, ammonia, baking soda, and a non-scratch sponge cloth. Mix a cleaning solution in a bowl and wipe the rust out with a non-scratch dishcloth.

How to Remove Rust from Glass – Removing Rust from Windows

Metal accents can rust and ruin the beauty of your glass windows. You need a heavy-duty mix of cleaning solution to clean.

Here's what you need.

1. 1/2 cup ammonia
2. 1 cup white vinegar
3. 1/4 cup cornstarch
4. Bowl
5. Spray bottle
6. Lemon

Step 1: Pour the ammonia, white vinegar, and cornstarch into a bowl and stir

Step 2: Put the vinegar solution into a spray bottle

Step 3: Spray it on the rust stains

Step 4: Scrub the areas with rust stains using a non-scratch cloth

Step 5: Rinse the non scratch cloth as needed

Option 1: For stubborn rust cut a lemon in half and rub half of the lemon directly into the rust stain to remove it

Option 2: Squeeze a lemon and use the lemon juice directly on the rust stains

Step 6: Squeegee your windows dry from top to bottom

Step 7: Dry the edges with an old wash cloth

This cleaning solution removes rust stains and cleans your glass and mirrors. If you're interested in cleaning a drinking glass, then use this method instead.

Clean rust stains from glass

What you need.

1. A spray bottle
2. Baking soda
3. Vinegar
4. A non-scratch sponge
5. Water

Step 1: Spray some vinegar on the rust stains of your glass

Step 2: Pour baking soda on the affected area and wait for the bubbles

Warning: Avoid burning your skin. Do not touch the glass while it's bubbling.

Step 3: Once the bubbling stops, use a non-scratch sponge to clean the area

Step 4: Rinse the glass under running water

Step 5: Scrub the rust stain again if needed

Step 6: Air dry

Here are other [ways to remove rust from metal kitchen utensils](#)

How to Remove Rust From Metal Kitchen Utensils

You can check out our article here on how to remove rust from [cast iron](#). Other than the cast iron, here are the methods you can use to remove rust from [baking pans](#) and knives.

Remove rust from baking pans

What you need.

1. Dishwashing liquid
2. A potato
3. All-purpose dishcloth

Step 1: Cut the potato in half

Step 2: Dip the half potato in dishwashing liquid

Step 3: Use that end to scrub the rust stains from the baking pans

Step 4: Rinse with water to see if the rust is gone

Step 5: Keep on dipping the potato in liquid soap and scrubbing until the rust stains are gone

Step 6: Rinse under running water

Step 7: Dry your baking pan with a non-scratch all-purpose dishcloth

Remove rust from knives

Here is what you need:

1. White vinegar
2. A container that can fit your knife
3. A non-scratch scouring scrubber
4. An all-purpose dishcloth

Step 1: Fill your container with vinegar

Step 2: Place your knife in the container

Warning: Be careful when handling heavy knives. Make sure the container is steady and can hold the knife.

Step 5: Let the knife soak in the vinegar for five minutes

Step 6: Remove the knife and scrub the rust stains with a scouring scrubber

Step 7: Rinse your knife under cold water

Step 8: Dry it with an all-purpose dishcloth
